SECTION - C

Read the case and answer the questions

10×02 = 20 Marks

Q. 5: Case Study:

The Mussoorie hill chain of the Himalayas includes Doon Valley. The Doon Valley had a lot of resources. Numerous rivers originate in the Mussoorie hills, completing the valley region's natural flourishing. However, in the 1950s, it has become a location for limestone mining, as well as the valley began to degrade as a result of the use of explosives, tree cutting, and severe mining.

Throughout 1955 and 1965, the Doon valley's limestone mining methods grew more dispersed. Detonation was used to remove minerals, which resulted in a lack of flora in the valley. Mudslides, flooding, water shortages, extreme heat, and agricultural decimation had robbed the valley of its beautiful nature by the early 1980s.

The Uttar Pradesh State Department of Mines outlawed mining in the state in 1961. However, in 1962, the state legislature approved several mining licences for a period of 20 years, and quarrying resumed. As contracts for restoration were available in 1982, the state banned them due to environmental damage. Mining firms have petitioned the Supreme Court to overturn the government's decision. The Allahabad high court approved mining in the Doon valley, favouring economic gain above environmental concerns.

In 1983, a regional Dehradun NGO, the Rural Litigation and Entitlement Kendra (RLEK), filed a protest letter with the Supreme Court against India's environmental poverty. This complaint was filed as a writ petition with the Supreme Court of India under Article 32 of the Indian Constitution. The Supreme Court ordered that all present mining operations in the valley be evaluated. The court also ordered the state government to build a website for the region's agriculture.

Questions:

Q. 5: (A). Discuss the issues involved in the case.

Q. 5: (B). What according to you should be the best way of living in harmony with nature.

Mapping of Questions with Course Learning Outcome

Question Number	COs	Bloom's taxonomy level	Marks Allocated
Q. 1:	CO1		10 marks
Q. 2:	CO2		10 marks
Q. 3:	CO3		10 marks
Q. 4:	CO4		10 marks
Q. 5:	CO5		20 marks
